DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 52-60, drawn to an antibody to the 46 Kd MW human milk fat globule differentiation antigen and a kit, classified in class 350, subclass 387.1.

Group II. Claim 61, drawn to an *in vivo* method of imaging a neoplasia of epithelial origin, classified in class 435, subclass 7.1.

Group III. Claim 62, drawn to an *in vivo* method for delivering a therapeutic agent to target neoplastic cells of epithelial origin, classified in class 424, subclass 130.1.

Group IV. Claim 63-64, drawn to an *ex vivo* method for delivering a therapeutic agent to target neoplastic cells of epithelial origin, classified in class 424, subclass 130.1.

The inventions are distinct, each from each other because of the following reasons:

Inventions (I) and (II-IV) are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (M.P.E.P. 806.05 (h)). In this instant case, an antibody could be used for a materially different process, e.g. for purification of its antigen.

The methods of groups II-IV are distinct from each other because they differ at least in objectives, method steps, reagents and/or dosages, and/or schedules used, response variables and criteria for success.

Because these inventions are distinct for the reason given above and have acquired a separate status in the art, and because the searches for the groups are not co-extensive, restriction for examination purposes as indicated is proper.

Applicants are required under 35 USC 121 to elect a single disclosed group for prosecution on the merits to which the claims shall be restricted, even though the requirement be traversed..

Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. 1.48(b) and by the fee required under 37 C.F.R. 1.17(h).
